

NeuroPerspective

Our original and still unmatched bimonthly review of the neurotherapeutics area. Since 1995, NeuroPerspective has provided accurate, independent, and provocative coverage of the science, the programs, the disorders, and the companies working to put them all together.

Six issues per year: Five feature reviews of two major therapeutic areas; the January/February issue overviews the sector on a company-by-company basis. Each issue also includes reviews of CNS oriented companies or Big Pharma partners provide concise assessments available nowhere else.

NeuroLicensing 2015-16

NeuroLicensing 2015-16 is NIR's completely revised and updated review of current trends in CNS deal parameters, licensing strategies, and candid assessments of the major and midsize companies involved in CNS inlicensing. Licensing agendas and performance are fully appraised. NL 2015-16 provides a vital resource for licensing efforts on both sides of the transaction, both licensors and licensees. Now available for immediate download... **91 pages.**
